(Further Descriptions and self-context)

Attribute

hasAttribute
(1 or more)

hasValue

hasType

SpatialObject
(from Geometry Graph)
(GeoSpatialObject Itself)

represents

SpatialRepresentationObject
(extension of Geometry Graph)
(Spatial Information Object)

Value

Type

(Possible Types:
Identity
Void/Solid
Position
Containment
Shared
Grouping
Relations
Connections
Definitions
Etc...)

refersTo
(1 or more)

hasContextRelation
(1 or more)

hasValue

hasType

ContextualizedRelation

(Contextual and Relational references to other Spatial Objects)
